Experience

- ZIP Financial Technologies, Inc.** Jan 2025 - Present
API Developer
 - Actively participated in daily stand-up meetings to enhance team collaboration.
 - Developed and maintained RESTful APIs to support application integration and functionality.
 - Conducted thorough unit testing to ensure code quality and reliability.
 - UAT and PROD issues, delivering timely resolutions and support.
- Avensys Consulting Inc. - ACCENTURE PH** March 2024 - December 2024
Java Springboot Developer
 - API Development and Integration: Creating and maintaining RESTful API
 - Code Quality and Review: Writing clean, efficient, and well-documented code. Participating in code reviews to maintain high standards and improve team knowledge sharing.
 - Testing and Debugging: Conducting unit and integration testing using tools like JUnit and Mockito to identify and resolve bugs and optimize performance.
 - Collaboration: Working closely with cross-functional teams, including front-end developers, QA, and product managers, to align development with project goals.
 - Agile Participation: Actively participating in Scrum ceremonies, including sprint planning, daily stand-ups, and retrospectives, to ensure alignment on project progress and timelines.
 - Continuous Improvement: Identifying opportunities to improve backend processes, suggesting enhancements, and implementing performance optimizations.
- FUN J. Software Development Corp.** April 2023 - December 2023
Java Developer
Full-stack development
 - Writing clean, efficient, and scalable code using Java programming (Backend) language, React (Frontend).
 - Implementing business logic, integrating with databases, creating APIs, ensuring the overall performance and security of the backend system, Creating User Interface Development using React
 - Troubleshooting and debugging issues, as well as conducting code reviews and optimizations
- Dynamic Strategy Solutions Expert - Innovations Group** May 2022 - March 2023
Java Development Engineer
 - Develop, and maintain the server-side logic of web applications.
 - Writing clean, efficient, and scalable code using Java programming language and related frameworks
 - Implementing business logic, integrating with databases, creating APIs, and ensuring the overall performance and security of the backend system.
 - Collaborating with front-end developers, software architects, and project managers to understand

requirements and translate them into technical solutions.

- Troubleshooting and debugging issues, as well as conducting code reviews and optimizations.

Education

- **Saint Mary's University**
Bachelor of Science in Information Technology

2015-2020

Skills

- Programming Language: Java 8+ up
- Core Java Skills: OOP, Collections framework, Exception handling
- Framework and Libraries: Spring Framework(Spring Boot), Hibernate/JPA, React
- Database Management: MySQL, NoSQL(Redis)
- API Development : RESTful APIs web services
- Version Control : Git, Github, Gitlab
- Development Tools: IntelliJ(IDE), Maven, Gradle, Jenkins, Docker, Sonarqube, Postman
- Testing: JUnit, Mockito, Postman
- Software Development Methodologies: Agile (Scrum)
- Logging: ELK (Elasticsearch, Logstash, Kibana)
- Familiar with AWS Cloud Watch and ECR(Elastic Container Registry)
- Problem Solving: Strong analytical and troubleshooting skills to resolve backend issues effectively
